

Annelize Krause

Data Analyst

Helmstedt (Hannover region), DE | +49 151 71741936 | Work authorisation: German Residence Permit (Permission to Work)
krauseannelize@gmail.com | annelizekrause.com | [LinkedIn](#) | [GitHub](#)

Summary

Data analyst pairing a commercial law degree (LLB) and a hands-on operations background with formal data analytics training. Turns messy operational data into analysis-ready datasets, with a compliance-aware lens few analysts bring. Proven business impact: built a custom inventory-forecasting database that eliminated third-party subscription costs, automated a five-person monthly process to cut workload by 90%, and digitised 60,000+ transactions for analysis. Relocated to Germany and transitioned into data.

Skills

Programming: SQL (PostgreSQL, BigQuery), Python (Pandas, NumPy, Scikit-learn, PyCaret)

Visualisation: Tableau, Seaborn, Matplotlib, Plotly

Data & Analytics: Exploratory Data Analysis (EDA), Statistical Analysis, Machine Learning, Model Explainability (SHAP, LIME), Time Series Forecasting, NLP, Computer Vision, Data Cleaning, Feature Engineering

Databases: PostgreSQL, BigQuery, Microsoft Access

Productivity: Excel, Google Sheets, VS Code, Google Colab, Jupyter Notebook

Automation & Data Pipelines: n8n, Python (web scraping, ETL)

Collaboration: Git, GitHub, Notion, Trello, Airtable, Avaza, Slack, Google Drive, OneDrive, Dropbox

Languages

English (C2), German (B1), Afrikaans (Native)

Experience

Data Analyst Intern

May 2026 - Present

Researchpreneurs

Germany (Remote)

- Building a Python pipeline that scrapes investor, startup, and funding data into a lightweight SQL database to answer business questions.

Operations and Data Specialist

Nov 2015 - Jan 2019

Contractor — BigSpool Inc., Tilburg University & others

South Africa & Germany (Remote)

- Built a custom Microsoft Access database for inventory forecasting across 7 marketplaces and 5 brands, eliminating monthly subscription costs and improving stock accuracy.
- Managed \$250K in inventory and coordinated 50+ product launches, delivering 50,000+ SKUs on time through cross-functional team alignment.
- Digitised 60,000+ historical transactions and 10,000 merchant records for academic research, resolving data inconsistencies and enabling analysis.

Services Assistant

Aug 2013 - Sep 2015

ENSafrica (Africa's Largest Law Firm)

Cape Town, South Africa

- Automated a manual monthly expense allocation process involving 5+ team members, reducing administrative workload by 90% and improving marketing spend accuracy.
- Designed and implemented a custom access-card database to track card ownership and loss patterns across 6 office locations, enabling identification of repeat offenders and improving security oversight.
- Maintained internal personnel records for 1,000+ employees, ensuring data consistency.

Career Break

Relocation & Data Analytics Retraining

Feb 2019 - Apr 2026

Self-directed

Germany

- Relocated from South Africa to Germany and completed the German B1 integration course (2023).
- Retrained in data analytics: self-study, the Google Data Analytics certificate (2024), then a full-time Masterschool program (2025).

Projects

n8n TalentBridge | n8n · Python · Gmail API · Google Sheets

Apr 2026

[YouTube Walkthrough](#)

- Built a 6-stage candidate intake automation pipeline integrating email triggers, code nodes, structured storage, and conditional notifications.

ML Car Price Prediction | Python · Scikit-learn · PyCaret · SHAP · LIME

Apr 2026

[GitHub](#) · [YouTube Walkthrough](#)

- End-to-end regression project covering manual pipeline, automated model comparison, and white-box/black-box explainability; engineered features outperformed raw inputs as top price predictors.

NLP Disaster Tweets Classification | Python · Scikit-learn · NLP · Text Vectorisation

Feb 2026

[GitHub](#) · [YouTube Walkthrough](#)

- Built a binary text classifier for disaster-related tweets, comparing baseline and tuned approaches with documented preprocessing trade-offs.

CIFAR-10 Image Classification | Python · TensorFlow · Computer Vision · Transfer Learning

Feb 2026

[GitHub](#) · [YouTube Walkthrough](#)

- Built a multi-class image classifier using ResNet50 transfer learning, with a two-phase frozen-then-fine-tuned approach and documented class-level error analysis.

Education

Data Analytics (Advanced Data Science and AI)

May 2025 - Present

Masterschool

Full-Time Training Program

- Hands-on experience with SQL, Python, Tableau, EDA, statistical analysis, ML, NLP, computer vision, time series forecasting, and workflow automation (n8n) on real-world datasets.

Bachelor of Laws (LLB) (Commercial Law)

Jan 2002 - Nov 2011

University of South Africa (part time, distance learning)

Bachelor's Degree

- Worked as a legal secretary across South African law firms while completing the LLB part-time (2002 - 2013)

Certifications

telc Deutsch B1

Dec 2023

[Credential](#)

Salesforce Certified Platform Foundations

Feb 2024

[Credential](#)

Google Data Analytics Professional

Aug 2024

[Credential](#)
