Professional Summary

Results-driven professional with 18+ years of experience across legal, operational, and technical domains. Grounded in a legal foundation and shaped by a decade in operations, I specialize in transforming complex data into actionable insights that drive efficiency and ensure compliance. Since 2023, I've specialized in data analytics, applying SQL, Python, and visualization tools to optimize processes and support data-informed decisions. Currently completing a full-time Masterschool program, where I build real-world projects and develop scalable, impact-focused analytics solutions.

Technical Skills

Programming & Data Processing (SQL (PostgreSQL, BigQuery), Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), R (Tidyverse, Plotly), Spreadsheets (Excel, Google Sheets)),
Productivity Tools (Code Editors (VS Code, Google Colab), Visualization (Tableau), Version Control (Git, GitHub), Project Management (Trello, Avaza, Notion, Airtable), Collaboration (Google Drive, OneDrive, Dropbox, Slack))

Soft Skills

Analytical Thinking, Problem-Solving, Attention to Detail, Organizational Skills, Innovation & Creativity

Education

Masterschool Data Science	May 2025 - Present Training Program
-------------------------------------	---

- Gained hands-on experience analyzing large datasets using SQL, Python (Pandas, NumPy, Scikit-learn), and Tableau
- Developed proficiency in exploratory data analysis (EDA), data visualization, and storytelling using Tableau and Python libraries (Seaborn, Matplotlib)
- Applied statistical methods, machine learning algorithms, and time series techniques to forecast trends, detect anomalies, and evaluate model performance
- Explored advanced topics including NLP, computer vision, and LLMs, with practical exposure to GenAI tools and API integration

University of South Africa Commercial Law	Jan 2002 - Nov 2011 Bachelors of Law
---	--

Certifications

Google Data Analytics Professional Certificate link	Jun - Aug 2024
---	-----------------------

Salesforce Certified Platform Foundations Certificate link	Oct 2023 - Feb 2024
--	----------------------------

telc Deutsch B1 Certificate link	Dec 2023

Projects

Exploratory Data Analysis | Car Dataset

Sep 2025

[Project link](#)

- Performed data cleaning, wrangling, and feature engineering using Python, Pandas, and NumPy to uncover key factors influencing car prices.
- Visualized trends with Matplotlib and Seaborn, creating clear, actionable insights documented in Jupyter Notebook.

Business Performance Analysis | Unicorn Dataset

Aug 2025

[Project link](#)

- Analyzed unicorn startup data using SQL, Google Sheets, and Tableau to identify investment and valuation trends.
- Built an interactive dashboard to present funding distribution and growth insights across industries.

Work Experience

Relocation & Professional Development

Feb 2019 - Present

Germany

- Relocated to Germany and completed an integration course while proactively upskilling in data analytics with a focus on SQL, Python, and data visualization.

Operations and Data Specialist

Nov 2015 - Jan 2019

Individual Contributor

South Africa & Germany (Remote)

- Managed \$250K in inventory across seven marketplaces and five brands, and coordinated 50+ product launches, delivering 50,000+ SKUs on time by aligning cross-functional teams.
- Built a custom Access database for inventory forecasting, eliminating monthly subscription costs and improving stock accuracy across multiple sales channels.
- Digitized 60,000+ historical transactions and 10,000 merchant records for academic research, resolving data inconsistencies and enabling robust analysis.
- Streamlined customer support workflows by implementing reusable templates and centralized SOPs in Notion, reducing response times and improving onboarding and continuity across distributed teams.

Services Assistant

Aug 2013 - Sep 2015

ENSafrica

Cape Town, South Africa

- Designed and implemented a custom access-card database to track card ownership and loss patterns across six office locations. This enabled the identification of repeat offenders and reduced lookup time for lost cards, thereby improving security oversight and operational efficiency.
- Automated a manual expense allocation process that involved more than five team members over five days each month. This reduced the administrative workload by 90% and increased accuracy in marketing spend reporting.
- Maintained and updated internal personnel databases for over 1,000 employees to ensure consistent, reliable records and smooth operational workflows.
